

### REMARKS

The Examiner rejected claims 1-3, 9, 12, 19, 20, 23, 30, 40, and 41 under 35 U.S.C. 103(a) as being unpatentable over U.S. Publication 2003/0036351 to Forbs in view of U.S. Publication 2002/0053001 to Miura *et al.*

The Examiner rejected claims 4 – 7 under 35 U.S.C. 103(a) as being unpatentable over U.S. Publication 2003/0036351 to Forbs in view of U.S. Publication 2002/0053001 to Miura *et al.*, and further in view of U.S. Publication 2002/0118175 to Liebenow *et al.* The Examiner rejected claim 8 under 35 U.S.C. 103(a) as being unpatentable over U.S. Publication 2003/0036351 to Forbs in view of U.S. Publication 2002/0053001 to Miura *et al.*, and further in view of U.S. Publication 2002/0101907 to Dent *et al.* The Examiner rejected claims 10, 11, 13 – 18, 21, 22, 24 – 29, and 31 - 34 under 35 U.S.C. 103(a) as being unpatentable over U.S. Publication 2003/0036351 to Forbs in view of U.S. Publication 2002/0053001 to Miura *et al.*, and further in view of Applicants' admitted prior art. The Examiner rejected claims 44 - 47 under 35 U.S.C. 103(a) as being unpatentable over U.S. Publication 2003/0036351 to Forbs in view of Applicants' admitted prior art. The Examiner rejected claims 48 - 51 under 35 U.S.C. 103(a) as being unpatentable over U.S. Publication 2003/0036351 to Forbs in view of U.S. Publication 2002/0053001 to Miura *et al.*, and further in view of U.S. Patent No. 4,870,704 to Matelan *et al.*

Applicants have amended independent claims 1, 2, 19, 30, and 40.

Each independent claim (1, 2, 19, 30, and 40) now requires that a memory module include electrical terminals for sending data to and receiving data from a second circuit board. Thus, all independent claims now require that the memory module (1) be operable to

communicate with the second circuit board via radio transmissions **and** (2) be operable to communicate with the **same** circuit board via a plurality of electrical terminals on the memory module. It is Applicants' understanding that none of the cited prior art teaches a memory module that can communicate with a second circuit board both (1) via radio transmissions **and** (2) via a plurality of terminals. Thus, Applicants believe that all currently pending claims are allowable over the art of record.

### CONCLUSION

It is submitted that the present application is presently in form for allowance. Such action is respectfully requested.

Respectfully submitted,

By Hoyt A. Fleming III
